

The screenshot shows the DBeaver SQL editor interface. The top toolbar includes icons for file operations, editing, and execution. The main query editor contains the SQL statement: `SELECT COUNT(movie) FROM movie;`. Below the query editor is the 'Data Output' tab, which displays the result of the query as a table with two columns: 'count' and 'bigint'. The first row shows the value '29'.

	count	bigint
1		29
